Significant Weather Details

Saturday – September 3, 2011

| | |
|----------------------------|--|
| What and When | <ul style="list-style-type: none">• Isolated rain showers through 9 am, then scattered thunderstorms. The storms may become strong to severe after 9 am.• Severe thunderstorm watches and warnings are possible, which implies the possibility of wind gusts of 58 mph or more and/or hail one inch or more in diameter.• Torrential rainfall and frequent cloud to ground lightning strikes are also threats. |
| Forecast Confidence | <ul style="list-style-type: none">• Lightning and rain chances are low between 6am and 9am. After 9 am, be prepared for active weather. As of 5 am this Saturday morning, severe thunderstorm warnings were being issued in southern Wisconsin. These storms are moving to the east/northeast, so confidence in active weather is moderate. |
